

Kiran Vishwanath Rawal

MSc Graduate | BIM & Digital Construction

Location: Currently Glasgow (Open to Immediate UK Wide Relocation)

Visa Status: Graduate Visa (Full Right to Work), No sponsorship required

Email: rawalkiran977@gmail.com | Phone: +447733022309 | LinkedIn: [linkedin.com/in/kiran-rawal-bim](https://www.linkedin.com/in/kiran-rawal-bim).

Professional Summary:

Civil Engineer and MSc Advanced Construction Technologies & BIM graduate specialising in BIM coordination and digital delivery within contracting environments. Expert in managing federated models, conducting automated clash detection, and resolving technical design conflicts between multidisciplinary subcontractors and consultants. Proven track record in delivering ISO 19650 compliant information management and 4D simulations to improve construction efficiency and site safety.

Technical Skills:

- **BIM & Digital Engineering:** Revit (LOD Modelling, Family Creation), Navisworks (Clash Detection, 4D Simulation), AutoCAD (2D/3D Drafting), Civil 3D (Surface & Corridor Modelling), BIM Execution Planning, ISO 19650 Information Management
- **Structural & Civil Engineering:** Structural Analysis, Concrete & Steel Design, Earthworks, Foundations, Transportation Engineering, Water Resources Systems, Environmental Engineering
- **Construction & Project Delivery:** Quantity Take-offs (QTO), BOQs, Cost Estimation, Site Coordination, QA/QC, H&S Compliance, Construction Documentation, MMC & Offsite Construction
- **Sustainability & Energy:** Sustainable Construction Practices, SuDS, Low-Carbon Solutions, Net Zero Design Principles, Energy Simulation (ZEBproject), Waste Management & Environmental Assessment
- **Digital & Analytical Tools:** MS Office Suite, Excel Modelling, Technical Report Writing, Project Scheduling, Risk Analysis, Data Interpretation
- **Facilities & Asset Management:** Asset Information Modelling (AIM), Digital FM workflows, Operations & Maintenance data structuring

Soft Skills:

- **Teamwork & Collaboration:** Effective communication with multidisciplinary teams (architects, MEP, structural & site teams)
- **Problem-Solving:** Ability to resolve technical site issues, design clashes, coordination challenges, and engineering constraints
- **Attention to Detail:** High accuracy in drawings, models, take-offs, and engineering calculations
- **Time Management:** Able to manage multiple tasks, meet deadlines, and deliver within project timelines
- **Adaptability:** Comfortable working in dynamic construction/site environments and adjusting to new technologies
- **Leadership & Initiative:** Took responsibility for site supervision, design coordination tasks, and project documentation
- **Client & Stakeholder Engagement:** Clear communication, requirement understanding, and expectation management
- **Critical Thinking:** Evaluating technical decisions based on cost, safety, sustainability, and buildability

Work Experience:

BIM Modeler – Yash Ventures – Kolhapur, India 04/2024– 08/2024

- Managed and coordinated BIM models across multiple trades (Structural, MEP, and Civil), ensuring full compliance with project standards and BIM Execution Plans (BEP).
- Led clash detection and resolution workflows using Navisworks to identify and solve design coordination issues between subcontractors and consultants before site mobilization.
- Maintained project templates and documentation in a Common Data Environment (CDE) to ensure data accuracy and efficiency across the delivery team.
- Developed 4D BIM simulations to assist project managers with construction planning, logistics, and multi-disciplinary collaboration.

Site Engineer - Diya Constructions – Kolhapur, India 06/2022–03/2024

- Supervised site execution for commercial workplace and residential projects, ensuring strict adherence to structural drawings and safety standards.
- Acted as the primary point of contact for subcontractors and architects, resolving technical site issues and design clashes to maintain project timelines.
- Conducted rigorous site inspections and quality control (QA/QC), utilizing 3D model information to verify "as-built" accuracy against design intent.

Education:

- **MSc Advanced Construction Technologies and BIM** |University of Strathclyde, UK 2024–2025
- **B.E Civil Engineering** |Shivaji University, India
- **Diploma in Construction Technology** | MSBTE, India

Research Experience:

MSc Dissertation – University of Strathclyde, UK (2025)

“A SWOT Analysis Framework for Adopting the Modern Methods of Construction in BIM Pervasive Megaproject Delivery”

- **Evaluated MMC adoption strategies** within BIM-driven megaproject environments to identify performance bottlenecks, cost-efficiency gains, and digital integration opportunities across design, prefabrication, and site-assembly phases.
- **Proposed an actionable BIM–MMC synergy framework** improving project delivery through data-driven collaboration, modular standardisation, and real-time risk visibility, supporting productivity and sustainability targets in large infrastructure programmes.

Certification:

- **AutoCAD (Autodesk)** – 2D/3D drafting, civil layouts, annotation standards, and construction drawing production
- **Autodesk Revit (BIM)** – BIM modelling, parametric families, LOD coordination, quantity take-offs, and interdisciplinary model coordination
- **Autodesk Navisworks (BIM Coordination)** – Clash Detection, Model Federation, 4D Sequencing, Coordination Workflows and Issue Resolution
